

clima

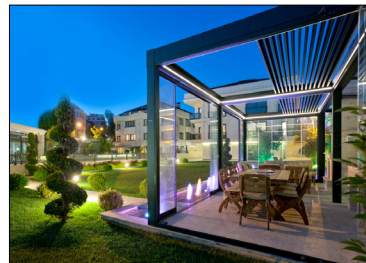

A beautiful, flat roof pergola system with aluminum louvers that rotate and retract. Sturdy construction made of an aluminium alloy of top quality with insulation capabilities delivers great resistance to wind and snow. All connections are concealed and provide great aesthetics. The louvers allow for controlled ventilation while shading is maintained. Complementary side wall closures make up for a complete beautiful outdoor space

▼ features

One module is 4m wide, 6m long and 3m high. Modules can be combined in any direction.

LED strip dimmer and RGB hidden lighting adds elegance to night outdoors

▼ aluminum colors

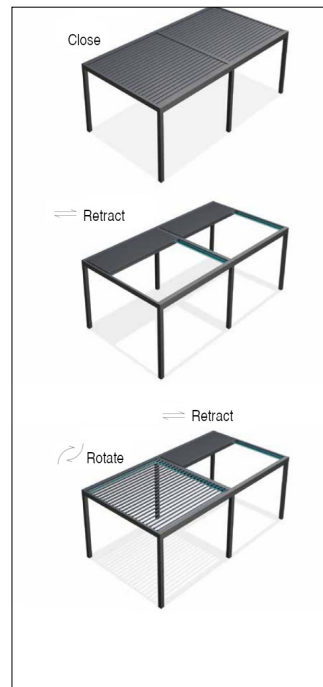

powder coating colors

or any RAL

▼ open/close/rotate      ▼ multiple modules

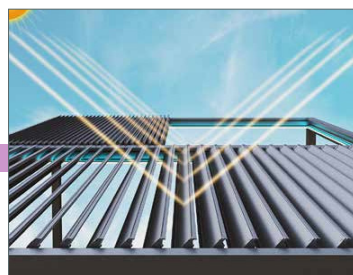

Two motors independently control rotation and retraction. Every module can be independently operated. Modules can be installed free standing, attached to a wall or to existing structures.

▼ benefits

controlled ventilation

protection from sun rays or open to the sky

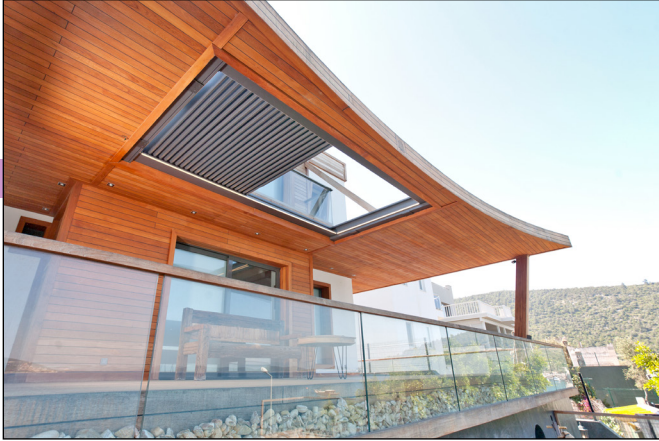

fully waterproof when closed

all rain water smartly drains away from louvers through the pillars

clima

Complementing beautiful residential architecture or making up a large roof top restaurant system, clima is a versatile luxurious addition offering light, ventilation and if needed protection from the elements.
